FORKLIFT LED INSTALLATION GUIDE

LED POWER

20W Watt Luminus LED

OPERATING VOLT

9-110V Volt DC

OPERATION TEMPERATURE

-40°C~80°C

WATERPROOF RATE

IP68

BEAM

Blue Spot

LIFE TIME

About 50,000 Hours

EMC

E-mark ECE R10, CISPR25 CLASS4

MATERIAL

Diecast Aluminum Housing,
Stainless Steel Bracket

INSTALLATION METHOD

1. Tools Preparation

Required tools: screwdriver, wrench, wire strippers.

2. Determine The Installation Position

Under the top roof rack (the angle of illumination covers 3 meters in front of the forks).

3. Fixing Forklift Light

Align the mounting holes with the bracket.
Tighten the M8 stainless steel screws and check that the light does not shake.

4. Wiring Connection

Red : Positive (connect to battery positive terminal).
Black wire: Negative (connected to battery negative terminal).

5. Restore The Battery Connection And Turn The Key To ON

Test the light switch/auto-sensing function.
Adjust the irradiation angle (keep the level down 15° to avoid glare).
